

Antifoam R-803

Antifoam R-803 is a powder form non-silicone defoamer based on hydrocarbons which can be used in different industries such as Concrete.

Antifoam R-803 is fully compatible with other components of coatings and adhesives in powder form.

Properties:

Appearance	: Free flowing white powder
Solid content	: Inorganic carrier blended with hydrocarbons and poly glycols
Solubility	: Dispersible in water
pH (1:10)	: 7.5 ± 0.5
Density @ 20 °C	: 0.350 gr/cm ³
Packing	: 25 Kg PE bags

Applications & Recommendations:

- Joint fillers and putties
- Leveling compounds
- Screeds (cement and anhydride based)
- Gypsum
- Cement
- Mortars
- Powder paints
- Adhesives

Antifoam R-803 is designed for concrete systems and dry blends in which Rockdefoam R-803 is used wet faster and more uniformly. Entrapped air, causing problems in pumping, troweling and obtaining a complete cavity fill, is eliminated, thus preventing excessive shrinkage, porosity and other disadvantages of the applied cement or concrete.
