

Polyethylene wax %30

Description

Polyethylene wax is an emulsion wax based on polyethylene. This product has high stability and resistance and is used in a variety of coating industries.

This product can create waterproof and anti-wear properties along with emulsion acrylic resins in the natural surfaces such as wooden surfaces

Specification

Appearance	Cream-colored liquid
Nature	Polyethylene emulsion
Activity,%	30
pH (1:10 solution)	9 ± 1
Density (gr/cm ³)	0.966
Viscosity, cp	120-170
Solubility	Soluble in soft Water
Packing,kg	50
Shelf life	Minimum 6 Months

Applications & Recommendation

A coating wax with suitable shine and used by the paint industry.

This product has a good shine, excellent anti-blocking, optimal hydrophobic properties.

Acrylic emulsion, acrylic styrene and polyacetate resins are compatible with this product and are easy to use.

Polyethylene wax

In the leather industry used as filler wax, anti-blocking and shiner with good filling power.
