

Wetting Plus

Paint & Coating Industry Wetting & Dispersing agent

Description

Wetting Plus is a Multipurpose surfactant- wetting -dispersing- penetrating agent for various application and industries

Specification

Appearance	Transparent clear watery viscose liquid
Nature	Di octyle sodium phosphite ether
Ionity	Anionic /nonionic
Activity , %	40 ± 1
pH ((%5 in water)	6.5 ± 0.5
Solid content	35 ± 1
Solubility	Soluble in water
Packing	PE drums , IBC tanks
Shelf life	1 Year

solutions and moderately stable in dilute , alkali & acidic

- Compatible with anionic and nonionic surfactants.
- It is very good dispersing agent for mineral and organic pigments and extenders.
- It has very high wetting property to sink all paint's ingredients into the water.
- It also has a very good penetration for both organic and inorganic pigments/ fillers/ extenders and etc.

Wetting Plus has also anti agglomeration property.

Storage Conditions

Containers should be well sealed to prevent water evaporation and skin forming. The product must be stored between 5-25°C. Freezing and direct sun. Refer to the Material Safety Data Sheet (MSDS) for this product prior to use.

Applications & Remarks

- Soluble in most polar organic solvents.
- Miscible with most aliphatic & aromatic hydrocarbon solvents.
- Chemically stable in neutral
