

AKH-L

Slip and Leveling additive (Solvent Based)

Silicone-free surface additive for solvent-borne coating systems to improve leveling, prevent cratering, help substrate wetting, and does not interfere with inter-coat adhesion. Furthermore, prevents floating/flooding of organic pigments in combination with TiO₂. The additive is recommended for baking enamels based on alkyd, acrylic or polyester resins, polyurethane coatings, two-pack epoxy coatings, and air-drying alkyd systems for both pigmented and clear coats.

Product Data

Physical Form: clear, colorless liquid
Active Content: 30%

Composition

Modified acrylic copolymer

Applications

Based on
Total formulation weight: 0.5%

Applications > Recommended for > Particularly Recommended:

Coatings > Solvent-based systems
> All kinds of resin systems

Special Feature:

The additive offers broad compatibility. It is recommended for all solvent-borne 1-pack and 2-pack systems, and for baking systems, such as general industrial coatings, can coatings, and coil coatings.
