

Anti Foam AKH-D530

Defoamer and Air Release Additive (Silicone Based)

Silicone and polymer-containing highly effective defoamer and air release additive for solvent-borne and solvent-free coatings, adhesives, and sealants. Particularly recommended for epoxy resin systems (flooring and epoxy internal flow coating for pipelines) and polyurethane. AKH-D530 produces rapid de-aeration of solvent-free epoxy and polyurethane compounds so that foam- and blister-free coatings can be produced.

Product Data

Physical Form:	Clear liquid
Active Content:	5%
Solvents:	Hydrocarbon mixture

Composition

Solution of foam-destroying polymers and polysiloxanes

Applications

**Based on
Total formulation weight:** 0.5% to 1 %

Applications > Recommended for > Particularly Recommended:

Coatings > Solvent-based systems
Epoxy and Polyurethane resin systems

Special Feature:

Effective in low dosages
